In short: Excellent all round experience

In full: The whole organisation of the event was excellent from start to finish with the PA bod keeping everyone inform, as long as you did not get to close to the speakers. Fantastic start and finishing area in the park excellent for picnic/kids afterwards. reasonably challenging course, with the nasal/lung clearing odour at 3k keeps you going. Great goody bag and great people.

In full: The organisation and marshalling was very good, the course, out and back with a 3k loop of the airfield was testing but you knew you had the hill to run up near the end, so you could leave a bit in the tank for that. The airfield section was rough underfoot, but this was mentioned in the pre race information, so was expected. The silage/manure on the airfield section cleared the sinuses, you don't get those real country smells very often :-)

In short: For an inaugural race, it couldn't have gone much better.

In full: The marshalling was excellent - from the moment you approached the car park, at race HQ, around the course itself, to the distribution of the goody bags at the end it was all very friendly and supportive.

Race started on time.

Good value goody bag - it was great to have a choice of sizes for the t-shirt rather than the usual XL which drown most runners and nice to have a choice of water or energy drink and fruit.

The silage/manure piles (?) on the airfield were a novel way to encourage us to go a bit faster and get away from the smell! If only they could flatten out the final hill!!!

In short: Well organised, great race - if a little smelly!

In full: The guys did a great job in organising this race - everything went like clockwork, they'd made a huge effort for both runners and supporters which really showed. They'd even arranged nice weather! The course is a good one but the fast, downhill start is paid for later with a long uphill finish. The manure being dug up on the airfield depleted oxygen supplies a bit but that wasn't the end of the world.

The refreshments and goody bags at the end were fab and the trophies (not that I won one) were really good quality. Most of all I liked the early (9:30am) start - that way you had almost a whole day free after to enjoy the sunshine!

In short: Well organised and a good atmosphere

In full: First 10k race I have done and really enjoyed it. The only part I didn't enjoy was the gravel of the airfield but being local I realise that it must be needed to get to the 10k distance and I wouldn't change the route. Thanks to all who helped organise.

In short: Great organisation and a good atmosphere. Most of the race was pretty good albeit challenging!!

In full: The worst bit for me was running round the airfield with sileage or whatever it was stacked up by the sides. I have never in my life smelt anything so disgusting it actually made me heave and I was close to stopping at this point. Why on earth on a warm day would anyone put this on a 10k race route?? Apart from that it was quite challenging hill wise in places especially in the last 2kms didn't appreciate that long hill at that point in the race. On a positive note the marshalls were good the organisation was superb and the guy in the microphone was superb and made everyone feel good!! Goody bag was great too!!

In short: A tough but friendly event

In full: Being local to Brackley I thought I was pleased to hear that they decided to host a 10Km race.

Unfortunately, with a new baby in tow training was less ideal, more non-existent. I began to worry that being the first time this event was held it would be badly organised, little supported with things like Marshals and KM markers and generally unenjoyable. I couldn't have been more wrong. The small size of the event meant that it was incredibly personal and friendly. It was highly organised and although there was little crowd support on the event, there was a Marshal on every corner cheering you round. Which was just as well because this event was tough. The hills took all strength out of my legs! Perhaps the only slight disappointment was that there was no medal at the end. A small thing I know, but as I'm likely to do this again next, it's a shame I don't have that moment to prove I was there when the event began.

In short: Friendly, well organised and surprisingly tough!

In full: Really well done to the organisers, you would never have known this was the first time they had held an event! The P.A. kept everyone informed of the plan and timings. The marshalls were really encouraging & I would go so far to say it was one of the best marshalled races I have entered. The field was a nice mix of club and unattached runners and had a friendly feel. The course was a mix of rural road & airfield, which proved surprisingly tough with a few short sharp hills. A goodie bag at the end and some very nice trophies too, so very good value! The hard work of the organisers was very clear and they can be very proud of the race! I would recommend this to unattached and club runners alike!

In short: superb effort for a first event.

In full: First time for Brackley but their obvious experience in running in various events and their attention to detail meant the organisation, especially at the start area was excellent. A good P.A. system definately helped. I couldnt resist a double fried egg sandwich at the stART. Not ideal but it went with the Chicken theme. First 5k I nailed at 20.12 but at mid point we ran alongside the longest pile of cow poo in Northants which with wind assistance encouraged speed . The second 5k were harder and three uphill near the finish did my legs. An excellent course, an excellent event superbly hosted.

Details:

Scenery  60%
PB potential  60%
Atmosphere  80%
Organisation  100%
Value  60%
Beginner-friendliness  80%

In short: Very well organised inaugural running

In full: A very pleasant race which was well organised and marshalled. Quite low key as the first running but will improve in popularity if this year is anything to go by. Course is challenging and as it is undulating plus 3k of gravel probably not normally a PB course.

Date of review: June 12, 2010
